

Hillrom™

November 12, 2020

Dear Valued Customer,

We are issuing this letter to inform you that Hillrom is in the process of validating a spirometry filter for customers who are impacted by new COVID-19 (SARS-CoV-2) regulations. Due to the global impact of COVID-19, many organizations have begun requiring an inline or bacterial filter for all spirometry testing.

We are working with our partner, Medikro, to validate a solution that will fulfill the bacterial filter requirement, while also ensuring the high-quality spirometry testing results we know our customers expect and need.

The dates we are working towards for each product family are listed below.

Product Family	Estimated Date of Release
Welch Allyn® Diagnostic Cardiology Suite™ (WADCS)	November 2020
CardioPerfect® Workstation, SpiroPerfect (CPWS)	January 2021
Welch Allyn CP 150™ ECG	April 2021

A selection of the Hillrom impacted part numbers is attached to this letter, as well as the type of spirometer that is used.

Hillrom thanks you for your continued support and understanding in this matter. We remain committed to assisting your organization in providing the best care possible.

If you have further questions, please do not hesitate to contact Hillrom customer care.

Sincerely,

Lillian V. O'Neill
