Re: Neonatal Soft Blood Pressure Cuff Backorder / Product Substitution

Effective April 1, 2020 the below Neonatal Soft blood pressure cuffs (40EA/CS) will be on backorder for an estimated 8 weeks.

We can offer a product substitution during this time and the cross-referenced items are provided in the attached file.

Cross Reference Options:

- Option 1: Welch Allyn Neonatal Soft blood pressure cuffs **(10EA/BX) ***
- Option 2: Trimline Neonatal Vinyl blood pressure cuffs **(40EA/CS)**
- ***Please note the different quantity per unit of measure. The impacted Neonatal Soft BP Cuffs ship in cases of 40 cuffs (40EA/CS)**

Most substitution options provide a like-for-like cross reference which would require only a part number change.

However, there are five impacted part numbers that would require a device connector modification to our NeoQuik (NQ) connector. This information is listed in the attached cross reference file.

- NeoQuik device side connector part numbers for device modification:
 - 5082-301 - NEOQUIK CONNECTOR MALE 1/8" BARB 10/BG
 - 5082-302 - NEOQUIK CONNECTOR MALE 3/32" BARB 10/BG

Backordered Neonatal Soft SKU	Description	QTY/UOM
